**Abstract:** School violence and bullying in China is under investigated, though it has become a national concern recently. Using updated national representative survey data collected in 2016 from seven provinces across China, covering students from all pre-college school types (primary, middle, high and vocational schools), this paper analyzes the prevalence of school bullying and the correlation with several school attributes. The incidences of reported bullying, bullying others and witnessing bullying are 26.10%, 9.03% and 28.90%, respectively. Primary school students are more likely to be involved in bullying behaviors. Students from elite schools (leading schools) are also more likely to be involved. Relation with teachers, relation with peers and perceived academic achievement are protective factors. Being a boy is the only significant predictor of school bullying among the family and demographic characteristics used. The results highlight the importance of school climate on preventing school violence and bullying, and a whole-school intervention approach is needed for future intervention.

**Keywords:** school bullying; victim; perpetration; witness; China; school climate

### 1. Introduction

School bullying is a worldwide phenomenon and a growing but relatively new research area with problems, disagreements and unsolved issues since its emergence in the late 1960s [1]. School bullying can cause post-traumatic stress disorder (PTSD) [2], low self-esteem [3], psychosocial problems such as depression, loneliness, anxiety, emotional issues [4,5], somatic symptoms [6], poor academic achievement, psychosocial adjustments [7], deviant behaviors [8], long-term mental health problems and even violent [9] or suicidal behaviors [10,11]. Both victims and perpetrators of school bullying can experience these consequences, with the potential of reciprocal influences [12]. Prior cross-cultural studies on school bullying indicate that incidences of bullying in collectivism-oriented countries like China are much lower than individualism-oriented countries such as the United States [13], and school bullying is a topic with both universal patterns and culturally sensitive characteristics [14]. Thus, examining school bullying among Chinese adolescents could not only contribute to our understanding of school violence and bullying in China but also add valuable knowledge in this field worldwide.

Recent school violence cases in China, such as the attack at Beijing's Zhongguancun No. 2 Primary School where several students bullied one boy by pouring a trashcan full of used toilet paper and feces on his head, renewed the severity of school violence in China [15]. These extreme cases were amplified by the internet and social media, and attracted lots of attention from the public and authorities [16]. The Chinese education and legal authorities have pledged to fight against school bullying and violence

## Abstract

The present demographic scenario of the country shows the rising trend of adult population. According to census report 2011, there are 60.3% people belonging to 15 to 59 years of age group and the percentage of people above 60+ age is 8.6%. Our country fails to provide due respect, care, affection, security and health related facilities, which elderly people utmost require. A number of cases of adult abuses are reported in news papers as these people are easy victims of violence and criminal activities. The society comes to know about only those problems, which are reported, the innumerable cases of disrespect and neglect are not given any consideration. The situation becomes all the more worst when perpetrators are very near relatives and in some cases blood relatives also. This growing insensitiveness is a threat to our society. Sincere efforts are needed to tackle this alarming problem. The present paper describes the available data [1]-[3] on the old people, their dependence ratio, the problems being faced by them and suggestive measures to provide social and emotional security to them.

## Keywords

Domestic Violence, Elderly Abuse, Violent Offenders, Bullying against Elders

## 1. Introduction

The population of the country is passing through the transitional phase. At present more than 50% of the present population comprises of youth and we may hope that our country would develop fast as the responsibility lies on young shoulders. But the remaining population comprises of 8.6% old age people or senior citizens whose responsibility is also on young generation. Ageing is a major demographic issue and is faced by all the countries. In 2009, the percentage of old people in the country was 7% and by 2050, it would increase up to 20% of the total population [4]. As a matter of fact, these

The benefits of effective B2B e-commerce include lower costs associated with selecting suppliers, establishing prices, ordering, and finalizing transactions. Web anger is caused by such things as slow dial-up connections, busy servers, missing links, excessive results when doing a search, and very often, poorly designed websites that make you go through hoops to find what you want.  Cyber abuse is a form of bullying or harassment using electronic means. Online shopping is becoming increasingly popular because of the speed and ease of use for customers. It also helps the purpose of public sector efficiency, improving transparency and accountability in government functions and allowing for cost-saving in government administration. The College is the first Institution in the University of Kerala to receive accreditation from the National Assessment and Accreditation Council (NAAC) in 1999. and Persistent Systems Ltd. It plans to focus on appropriate pedagogy for e-learning, providing the facility of performing experiments through virtual laboratories, online testing and certification, on-line availability of teachers to guide and mentor learners, utilization of available Education Satellite (EduSAT) and Direct to Home platforms, training, and empowerment of teachers to effectively use the new method of teaching-learning, etc. High-quality e-content is free of cost to all learners in the country. The objective of this effort is to take the best teaching-learning resources to all, including the most disadvantaged. Cyber abuse is when someone, typically a teenager, bullies or harasses others on the internet and in other digital spaces, particularly on social media sites. Integrated Command and Control Centre is centralised system that will provide a range of services. Connecting vendors, producers, consumers and waste generators. Bhopal became the first city under Smart City Mission to launch ICCC in July 2018. It is jointly developed by the Indian Institutes of Technology and the Indian Institute of Science. India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,75,89,056+ Students The correct answer is ISI. The prime objective of e-Rakam is to assist farmers with payment directly into their bank accounts without any intermediaries. Common Service Centre Schemes (CSC) are a Special Purpose Vehicle set up by the Ministry of Electronics & IT under the Companies Act, 1956 to oversee implementation of the CSC scheme. E-Governance projects could be broken into various components and their computerization could then be phased according to the ease of implementation. The platform has been implemented at the National Institute of Technology (NIT), Kurukshetra, a participating unit under the World Bank-supported Technical Education Quality Improvement Program (TEQIP).  So far, a total of 38 modules have been implemented in NIT, Kurukshetra. The mark certifies that a product conforms to an Indian standard (IS) developed by the Bureau of Indian Standards (BIS), the national standards body of India. Mosquito tracking India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,75,89,056+ Students The Information Technology Act, 2000 The Information Technology Act, 2000 (also known as ITA-2000, or the IT Act) is an Act of the Indian Parliament (No 21 of 2000) notified on 17 October 2000. e-Governance facilitates interaction between different stakeholders in governance. The aim of this mission was to develop 109 cities across India in order to provide world-class infrastructure, facilities and lifestyle to their residents. These interactions may be described as follows: G2G (Government to Government) G2C (Government to Citizens) G2B (Government to Business) G2E (Government to Employees) The broad goals of the e-Governance are:  Better service delivery to the citizens Ushering in transparency and accountability Empowering people through information Improved efficiency within Government Improved interference with business and industry Therefore, to engage, enable and empower the citizens best describes 'E-Governance'  India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,75,89,056+ Students E-BusinessE-AdministrationE-GovernanceE-Marketing The advancement of Information and Communication Technology (ICT) is rapidly changing society and the mode of governance as well. The College was also the first to be re-assessed and re-accredited with 'A' Grade by NAAC in 2004.  India's #1 Learning Platform Start Complete Exam Preparation Daily Live MasterClasses Practice Question Bank Mock Tests & Quizzes Get Started for Free Download App Trusted by 2,75,89,056+ Students AccountableTransparentConsciousnessConsensus-oriented e-Governance is a vital force in achieving the aims of good governance such as improvement in quality, efficiency, and effectiveness of governance.

Bullying in schools is a systemic problem - learn the different types, causes, and effects of bullying. ... In 2016, the National Center for Educational Statistics reported that 1 in 5 students ... Just as the use of technology itself has evolved, so has the ability to bully. Bullying, once restricted to the school or neighborhood, has now moved into the online world. Bullying through electronic means is referred to as "cyberbullying." As adults, thinking back, it was just a generation ago that kids and teens were asking their parents for a phone in their room — ... The program presents three skits focusing on different types of bullying (physical, verbal, and social/exclusion). The 30– to 35-minute presentation is interactive and includes opportunities for students to share their ideas and ask questions. Ordering ... Bullying in academia is a form of workplace bullying which takes place at institutions of higher education, such as colleges and universities in a wide range of actions. It is believed to be common, although has not received as much attention from researchers as bullying in some other contexts. Academia is highly competitive and has a well defined hierarchy, with junior ... Dec 07, 2016 · This report documents a range of problems facing LGBT students. The concerns include bullying and harassment, exclusion of LGBT topics from school curricula and resources, restrictions on LGBT ... In social science and politics, power is the social production of an effect that determines the capacities, actions, beliefs, or conduct of actors. Power does not exclusively refer to the threat or use of force by one actor against another, but may also be exerted through diffuse means (such as institutions).Power may also take structural forms, as it orders actors in relation to one ... This may help identify ongoing issues such as bullying. 4. Structured These are a factual accounts that will describe how a child tackles a preset activity such as a simple maths task in Foundation stage. ... Event Sample This describes specific types of behaviour or events over a period of time. 8. Diary/Longitudinal Study Separate ...
